DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 22 December 2004 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 limits "selecting a predetermined grinding wheel" and the "simultaneously grinding plural grinding portions of a workpiece using plural grinding wheels". It is not clear if the predetermined grinding wheel is one of the plurality of grinding wheels later limited. Applicant should consider first limiting providing a plurality of grinding wheels and then selecting a predetermined grinding wheel from the plurality of grinding wheels before grinding begins.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3723

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by EP 1,088,621, as set forth in the Office action mailed 31 March 2004. It is the examiner's position that the first grinding wheel to leave contact with the workpiece is the predetermined grinding wheel, see EP '621, for example the abstract, "The control unit controls motions of the wheel heads in according to signals provided from the gauging unit, wherein controls all of tool heads to execute a finish grinding process, controls one tool head corresponding to one portion whose diameter became a required value to back off, and controls all of tool heads to execute a spark-out process after diameter of all of the portions became each required value. Therefore, it can prevent that accuracy of one portion machined by one tool head is deteriorated by effect of machining by another wheel head."

Allowable Subject Matter

6. Claim 6 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments filed 22 December 2004 have been fully considered but they are not persuasive. Applicant argues that '621 does not disclose controlling the grinding step such that grinding by a predetermined grinding wheel is terminated prior to a termination of grinding by the other grinding wheel, in that '621 must test the diameter

of either grinding portion before selecting which wheel will stop grinding.

"Predetermine" is defined as: To determine, decide, or establish in advance.¹ There is no limitation as to how far in advance the determination must be made. Here, the predetermination is made at the time of testing the diameter of the grinding portions. Applicant has not clearly and definitely limited the step of predetermining the grinding wheel, please refer to the rejection under 35 USC 112 above.
